

ORTIKOV ZAHIRIDDIN

MAIN GOALS

Electrical engineer, MEPhI graduate (Nuclear Power Engineering and Thermal Physics), seeking a position in electrical design and power systems. Hands-on project experience in power supply and 10/0.4 kV substation modernization, plus 3D human-machine interface development for nuclear power plant process control systems (APCS). Eager to apply technical knowledge and problem-solving skills to the development and optimization of reliable, efficient electrical systems.

LANGUAGES

- English: Elementary
- Russian: Advanced
- Uzbek: Proficient

EXPERIENCE & PROJECTS

Master's Thesis (MEPhI, Moscow) | 2026

Application of 3D Graphics for Building Human-Machine Interfaces in Process Control Systems (APCS)

- **Developed a 3D human-machine interface (HMI) prototype of a VVER-1000 reactor at KPO UMIKON.**

Bachelor's Thesis (MEPhI Tashkent) | 2024

Modernization of a 10/0.4 kV Substation

- **Worked on the modernization of the 10/0.4 kV substation of a student dormitory.**

Internship

Novovoronezh Nuclear Power Plant (Russia)

- **Completed an industrial internship at Novovoronezh NPP.**

Publication

"Development of a Power Supply System for First Category Consumers" | 2023 - 2024

EDUCATION

Bukhara College of Oil and Gas Industry, Bukhara

Graduated: 2020 | Higher National Diploma: Gas and Oil Industry

National Research Nuclear University MEPhI, Tashkent

Graduated: 2024 | Bachelor of Science: Electrical Power Engineering and Electrical Engineering

National Research Nuclear University MEPhI, Moscow

Graduated: 2026 | Master of Science: Nuclear Power Engineering and Thermal Physics

SKILLS

- **Electrical Power Supply Design**
- **10/0.4 kV Substation Modernization**
- **3D HMI for Process Control Systems (APCS)**
- **Technical Documentation**
